Gujarat state branch
Physiotherapy department

Achievement:

In our physiotherapy department Patient named Shantaben H. Chauhan, Age - 50, have # S/H (It) shoulder. She had taken treatment in civil hospital. They given conservative treatment for fracture. She had severe problem and can't lift her hand even after 3 month. Doctor suggested her physiotherapy treatment. And advised her that it takes 6 month time as she had major problem. She came to our centre and we started physio treatment inform of exercises. Now, due to good care and personal attention she recovered very fast and can lift her hand independently only in 40 days treatment. She become very happy. Their doctor also become surprised after seeing her recovery.
